

Project Deliverables Submission Structure

Students need to create the folders as per the project phase and upload the files in the respective project folder as per the phase.

Step 1 - Create the Assignment Folder and the respective sub folders in it as shown below

Step 2 - Team Leads needs to create the **Project Design & Planning** folder to submit the files in the respective folders

Project Design & Planning
(Main Folder)

Create the main folder with the name of project design & planning

Ideation Phase (Sub Folder)

Create the sub-folder of ideation phase to submit the files of that respective phase.

Project Design Phase 1 (Sub-Folder)

Create the sub-folder of project design phase 1 to submit the files of that respective phase.

Project Design Phase II (Sub-Folder)

Create the sub-folder of project design phase II to submit the files of that respective phase.

Project Planning (Sub-Folder)

Create the sub-folder of project planning to submit the files of that respective phase.

Note: In this phase only the team leader has to submit the files of the phase its the team based submission not the individual submission

Step 3 - Team Leads needs to create the **Project Development Phase** folder to submit the files in the respective folders

Project Development Phase
(Main Folder)

Create the main folder with the name of the project development phase

Sprint 1 (Sub Folder)

Create the sub-folder of sprint 1 and upload the files i.e Code & Test cases performed in sprint 1

Sprint 2 (Sub Folder)

Create the sub-folder of sprint 2 and upload the files i.e Code & Test cases performed in sprint 2

Sprint 3 (Sub Folder)

Create the sub-folder of sprint 3 and upload the files i.e Code & Test cases performed in sprint 3

Sprint 4 (Sub Folder)

Create the sub-folder of sprint 4 and upload the files i.e Code & Test cases performed in sprint 4

Note: In this phase only the team leader has to submit the project related files its the team based submission not the individual submission

Step 4 - Team Leads needs to create the **Final Deliverables** folder to submit the files i.e the final code files along with the project report, demonstration video link and the dataset used if any.

Final Deliverables

(Main Folder)

Create the main folder with the name of final deliverables
and submit the final code, project report, demonstration
video link, dataset (if any).
